

Training Schedule 2010

SIEMENS

We are proud to offer a comprehensive selection of classes to help you and your staff learn about the newest in automation technology. Please review our class selection and schedule and let your Buckles-Smith representative know if you have any questions. To sign up for a class, please contact Laurie Smith at (925) 449-7469, email her at lsmith@buckles-smith.com or go to the Siemens training website at <http://www.mysiemensevents.com/Industrial/Bucklesmith/random=9244834174> and click either on Lunch and Learns or Seminars (depending on the class type) to register. At these events, specially discounted starter packages will be sold to allow you to put your training to use immediately. Let Buckles-Smith help you get ready for your next automation project.

Training Schedule 2010

SIEMENS

SIMATIC S7-1200 PLC Overview

The S7-200 Micro PLC is truly in a class of its own: it is both compact and highly powerful – especially in relation to its real-time performance – it is fast, features great communication options, and comes with easy-to-operate software. Attend the S7-200 Lunch & Learn for a hands-on experience.

GP Drives Overview

General purpose drives are being used in more applications day after day. To keep up with this trend, we will be hosting a product training session to promote the general purpose drives from Siemens. During this event you will:

- Learn about the general purpose drives offered by Siemens
- Learn how to commission the drives
- Learn about cost saving applications where these products can be used

LOGO!- Product Update

Forget individual components, such as time switches, timing relays, counters, and contactor relays – LOGO! – The Programmable Relay is the complete all-in-one solution. Easy-to-mount, minimum wiring, easy programming, done! Attend the LOGO! Lunch & Learn for a hands-on experience.

Simocode Pro - The Advantage in Motor Management

Come learn about the unique advantage in motor management utilizing the SIMOCODE pro product line. You will receive hands-on experience with the SIMOCODE pro software and use it for motor management with the actual product.
