Lighting Retrofit Audit

Ensuring your warehouse or production floor operates efficiently and safely is critically important. While your logistics and automation platforms optimize your facility's performance, your lighting system is equally important when reducing operating costs and increasing safety.

Benefits of a Lighting Upgrade

Project Payback and ROI:

With San Francisco Bay Area's high labor and energy costs, an LED Lighting Retrofit can produce a quick payback period with attractive ROI. Based on total project costs, energy savings, labor savings, utility rebates and tax incentives, Buckles-Smith's Lighting Specialist can provide you with these project estimates.

Energy Savings:

If your facility has older, less efficient lighting such as T12 or metal halide lamps, and you are not taking advantage of modern lighting controls, you could see up to 70% savings on your utility bill.

Labor Savings:

Upgrading to LED technology will eliminate the routine changing of light bulbs in your facility, freeing up your team to focus on production efficiencies.

Safety:

A well-lit warehouse and production floor provides your team an environment to do their best work, while improving safety in the workplace.

Increased Property Value:

With upgraded infrastructure, you build pride in your facility, while increasing the value of your property.

Schedule a free lighting audit with a Buckles-Smith Lighting Specialist to determine the project payback period and ROI for your facility.

Contact us at 408-280-7777 or info@buckles-smith.com

Our Capabilities Include:

- Free Lighting Audits
- Product Selection
- Utility Rebate Coordination
- Title 24 Compliance Support
- Lighting Controls Support
- ROI Calculations
- Lamp, Ballast & eWaste Recycling
