

Supply Chain Solutions

With Buckles-Smith Supply Chain Solutions you can leverage your relationship with Buckles-Smith to effectively outsource a significant portion of your supply chain management. This allows your company to focus on its core competencies, while reducing acquisition and material handling costs with **zero increase** in cost of goods.

Process Improvement

Streamline production and procurement processes without disruption to staff or production while reducing overhead costs.

Time Utilization

Keep customer focused on core competency, customer satisfaction and productivity.

Inventory Management

Ensure the appropriate quality inventory is available in the right quantities at the point of use to maintain production and meet critical timelines.

Cost Control

Offer best overall market price considering acquisition, transaction, and carrying costs, freight, and assembly.

Quality Control

Maintain high quality product at point of use and long term sustainability and continuity of product.

"Buckles-Smith did an initial (inventory) study and determined what low- and high-volume parts were needed, and how often they were used. Right away we saw an immediate savings in inventory spending, which reduced our exposure. Overall, I'd say they have saved us more than 25% in inventory costs."

Senior Purchasing Manager, Tyco Thermal Controls

Northern California's Leading Independent Supplier of
Industrial Automation and Electrical Supplies.
